

Press Release
4th October 2012
Melbourne, Australia

we-do-IT accepts their Solutions Provider certification for Smallworld Design Manager™ and Electric Office™ this week.

Mark Humphreys, GE Digital Energy – Partner Manager & Dr Walter Hesse, Managing Director, we-do-IT, at the presentation of we-do-IT's certification for Electric Office and Design Manager.

'We became the very first certified Smallworld Partner in the Southern Hemisphere in 1996 and have grown and developed our skills in line with the continuous Smallworld technology improvements over the years' explains Managing Director we-do-IT, Dr Walter Hesse.

He continues - 'We currently have the most Community Connect Knowledge Assessments passed in Australia and New Zealand and the company is now expanding into North America and recently India'.

'Our work with GE's Smallworld™ products has put us at the forefront of Utilities/Telco business system integration efforts. We are proud that we developed the first Smallworld/SAP interface and were the first in the world to implement GE's PowerOn Classic™. We have been entrusted by our customers with more than 40 core upgrades of which 14 were 4.x upgrades.

GE's Smallworld Partner Program and the Community Connect is a great way for us to certify our team's skills and highlight the company's capabilities in products across the GE Smallworld™ product range.

About we-do-IT

we-do-IT is an Australian owned and operated leading provider of Geospatial and SmartGrid IT solutions.
