

## Zinfra Selects Innovapptive's Mobile Work Order Solution (mWorkOrder) for Victorian Electricity Networks

Zinfra is a leading service provider to the utility infrastructure sectors, delivering engineering, design, construction, project management and critical maintenance services on power, gas and water assets across Australia.

Innovapptive (through its local Australian partner, we-do-IT) was selected by Zinfra to implement its SAP® Certified Mobile Work Order Management solution (mWorkOrder) for the field operations and maintenance services on its clients' electricity networks in Victoria. The solution is improving overall field efficiency, service performance and productivity in delivery of critical services for its utility asset owner clients.

The Innovapptive mWorkOrder app will empower and enable Zinfra's field technicians and service teams to deliver a digital work experience within their operations and maintenance teams. The solution provides Zinfra's field workforce with the ability to streamline and digitise work processes, reduce manual data entry and duplication, produce accurate compliance reports and work offline with real-time access and visibility in geographically remote locations.

we-do-IT has also partnered with Innovapptive to enhance the mWorkOrder mobility solution with power of location. The LatLonGO® add-on integrates advanced mapping functionality, powered by HERE... The LatLonGO solution is SAP® Certified, connects to any GIS, displays asset layers as well as base maps and allows for OFFLINE asset attribute search, address search, vehicle and truck routing and turn by turn navigation.

### About we-do-IT

we-do-IT is a leading global supplier of spatial Enterprise Solutions for Telco, Utility and Government organisations. We offer consulting, development, training and system support services to our clients in telecommunication, electricity, gas, and water utility industries – provided by our specialist 250+ workforce from 21 different countries speaking 27 natural and 64 machine languages.

We have successfully integrated SAP with GIS since 1995 and specialise in ERP Mobility Solutions for all industries. We have wholly owned subsidiaries in Australia, New Zealand, North America, India, the UK and Germany.
